Hulbee Desktop Professional is a fast, handy and easy-to-use tool for finding your favorite files. It allows you to quickly search for data on your computer, simply by entering a few keywords. File Roller is a free file manager for Windows operating systems. It provides a quick way to search through any file, image or other binary file on your computer and preview it. It can also be used to remove duplicate files, compress, split and merge multiple files and perform various batch operations such as shredding. It is possible to select specific file types, folders, filenames or extensions and it allows you to limit the displayed results to a certain folder, file extension, file size or file format. SpaceSniffer is an application for Windows that allows you to easily find and view files with the same name as those on your computer or your entire external hard drive. The program is similar to findstr, but can provide you with more information. For example, you can specify the size of the data you want to search, the number of subdirectories to search and the content you want to ignore. You can even specify the case of letters to search. You can get rid of duplicates using the program. Wise Duplicate File Finder is a free application that helps you find duplicate files on your computer. Its built-in search engine can find duplicates based on file extension, file content or file size. You can also specify the type of file you want to find. The results you see can include the file name, date of creation, modification date or file size. You can search for duplicates and all the information you need about each file to remove them. FileSearch is a handy, free utility that can help you to find any file on your computer or the entire computer hard drive. It can search for files with specific extensions, filenames, filenames that match the search string, date of creation, date of last modification or file size. You can even search for filenames that are made of particular characters and not only those that have common extensions. It is also possible to search for specific words in file names and extensions and the results can include file names, date of creation, date of last modification or size. RegCleaner is a free application that helps you clean your registry. It allows you to delete unnecessary entries, diagnose missing entries, and repair corrupted registry entries. You can also exclude specific entries or find entries based on a
